2011-03-22: PHP security, some links

php:security

Several links I've received in the last few days, related to PHP security.

[PHP filesystem attack vectors](#)
[PHP filesystem attack vectors - Take Two](#)

[Local File Inclusion (LFI) of session files to root escalation](#)
[Shared hosting "file" handler PHP session dumper](#)
[LFI2RCE (Local File Inclusion to Remote Code Execution) advanced exploitation: /proc shortcuts](#)

[HTTP HEAD method trick in php scripts](#)
[Overriding $_FILES array during uploading multiple files in php.](#)

That's that,
